

EB-1/2/4 Terminal Boards

Type EB-4 (600 Volts - 30 Amperes)

Where a large amount of small wiring is necessary on the back of switchboard, the terminal boards listed below will be found very convenient for attaching the wires, not to exceed No. 8 in size. Molded-composition terminal boards make possible neat, compact arrangements on the back of the switchboard.

Type EB-1 and EB-2 (600 Volts - 100 Amperes)

Application

Where a high current rated block is necessary, such as in control power connections.

Description

The EB-1 is a one piece molded terminal board. Each is equipped with binding screws for circuit wire connections and a white marking strip for circuit identification. The EB-2 is of the same basic construction and dimensions as the EB-1 except that clamp (pressure) type connectors are furnished for circuit wire connections. Both the EB-1 and EB-2 will accommodate wires up to and including Number 4.

Type EB4

No. of Studs ¹	Catalog Number	Approx. Ship. Wt in lbs (each)	Dimension in inches (Fig.4)	
			A	B
2	2860351G1	¼	1¼	1¾
4	2860351G2	½	2½	1¾
6	2860351G3	¾	3¾	1¾

¹ Boards for more than six circuits to be made up of combinations of 2-, 4- and 6-stud boards.
